React - Styling & Advance React

Inline Styling :-

```js
import React from 'react'

function App() {
  return (
    <>
      <h1 style={{ color: "red" }}>Hello Style!</h1>
      <p>Add a little style!</p>
    </>
  );
}

export default App
```

JavaScript Object:-

```javascript
import React from 'react'

function App() {

  const myStyle = {
    color: "white",
    backgroundColor: "DodgerBlue",
    padding: "10px",
    fontFamily: "Sans-Serif"
  };

  return (
    <>
      <h1 style={myStyle}>Hello Style!</h1>
      <p>Add a little style!</p>
    </>
  );
}

export default App
```

CSS Modules:-

```css
src > # my-style.module.css > 🐷 .bigblue
1    .bigblue {
2        color:  DodgerBlue;
3        padding: 40px;
4        font-family: Sans-Serif;
5        text-align: center;
6    }
```

```js
> JS App.js > ...
1    import React from 'react'
2    import styles from './my-style.module.css';
3    function App() {
4
5
6
7      return (
8        <>
9          <h1 className={styles.bigblue}>Hello Car!</h1>;
10       </>
11     );
12   }
13
14   export default App
15
```
